

A wonderful original game for the Dragon 32 or Tandy Color Computer.

UGH!

With the coming Ice Age Ugh knows he must stock up with food. Stealing Pterry the Pterodactyl's eggs seemed a good idea though.. until Pterry started dropping hunks of rock onto Ugh's head! Things might not have been too bad, he may even have sneaked off with his winter store, when suddenly Rex the Tyrannosaurus came to Pterry's assistance!

Quite the most exciting and original game for the Dragon 32 or Tandy Color. Super graphics and animation make Ugh! a must for serious game players from 2 to 102!
